We have margin-based RMS System. Total Deposits of the clients are uploaded in the system and the clients may take exposure basis of margin applicable for respective security as per VAR based margining system of stock exchange and / or margin defined by the RMS based on its risk perception. Client may take benefit of "Credit for sale" i.e. benefit of shares held as margin by selling the same by selecting Delivery option through order entry window on the trading platform. The value of shares sold will be added to the value of deposit and on the basis of that client may take fresh exposure.

In case of exposure taken on the basis of shares margin the payment is required to be made before the exchange pay in date otherwise it will be liable to square off after the paying time or any time due to shortage of margin.
